EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Atlanta, GA

Master of Science in Quantitative and Computational Finance

August 2025 - December 2026

- Relevant Coursework: Stochastic Processes (Discrete-Time Pricing Models, Continuous-Time Pricing Models, Stochastic Processes), Computational Systems (Object-Oriented Programming), AI for Finance (Machine Learning, Deep Learning)

UNIVERSITY OF NORTH CAROLINA AT CHARLOTTE

Charlotte, NC

Bachelor of Science in Business Administration

August 2021 - May 2025

- GPA: 3.8/4.0
- Majors: Business Analytics, Finance
- Honors: Belk Scholarship
- Relevant Coursework: Applied Multivariate Analysis, Business Analytics, Derivative Securities, Fixed Income Securities, Cross-Section & Time-Series Econometrics

EXPERIENCE

Dimensional Fund Advisors

Charlotte, NC

Intern, Investment Analytics & Data

June 2025–July 2025

- Utilized Bayesian Optimization to automate fine-tuning of parameters in the ETF create/redeem liquidity process across 30 equity ETFs, improving index tracking performance and enhancing model calibration
- Achieved tracking error within 5% of target ticket charge in 87% of ETF baskets, validated under realistic conditions
- Implemented 4 dynamic thresholds based on model improvement and simulations run to reduce computational overhead

Intern, Investment Analytics & Data

June 2024–August 2024

- Developed a large-scale mapping system for 1M+ issuer identifiers, supporting dataset standardization
- Built a text extraction pipeline to flag 200+ issuers with disqualifying corporate structures for portfolio exclusions
- Proposed integration of new SEC infraction dataset covering 50+ companies to improve ESG analytics

UNC Charlotte Student Managed Investment Fund

Charlotte, NC

Quantitative Risk Analyst/Technology & Communication Sector Analyst

August 2023–May 2024

- Generated 39.26% return in Tech & Communications portfolio
- Conducted bottom-up equity analysis on 15 companies, applying fundamental screens to identify research candidates
- Presented 17 quantitative risk metrics (e.g., beta, Value-at-Risk) to support portfolio-level model calibration

Truist Financial

Charlotte, NC

FSE Intern, Enterprise Risk Management Programs and Frameworks Team

June 2023–August 2023

- Ran scenario tests to reduce variance between quantitative and qualitative risk scores across 8 risk types and 12 units
- Participated in QA of 300+ risk metrics, improving data quality for input into enterprise risk models
- Validated enterprise risk appetite model used in quantitative monitoring and escalation frameworks

PROJECTS

Portfolio Risk Modeling for the Student Managed Investment Fund

- Migrated portfolio-level risk analytics to Python, automating Value-at-Risk (VaR), beta, and factor exposure computation across multiple holdings
- Performed stress testing and scenario analysis to quantify portfolio loss distribution under adverse market conditions and sector-specific shocks
- Enhanced risk-reporting precision and exposure aggregation within the Fund's risk framework, supporting limit monitoring and capital allocation decisions

SKILLS & AWARDS

Programming: Python (Numpy, Pandas, scikit-learn, scikit-optimize), R, SQL

Tools: Bloomberg, Git, Microsoft Access, Microsoft Excel

Awards: Eagle Scout
